THE AROOSTOOK R R LOAN BILL

The joint special Committee to whom was referred the petition for the passage of a resolve in favor of a bill authorizing the city of Bangor to loan its credit in aid of the Northern Aroostook Railroad to the extent of $150,000 per mile for an amount not to exceed $1,000,000 in bonds bearing interest at seven per cent made a report Saturday evening which was considered in joint convention of the two branches of the City Council. The report was signed by four members of the Committee Aldermain Crosby and Councilman Morrison withholding their signatures and it proposes a number of amendments to the loan bill together with an additional section Several of the proposed amendments are so interwoven with the text of the bill that the entire republication of the bill would be necessary to make them understood, and as they are likely to be still further modified before definite action is taken, we will simply endeavor to state the substance of the most important provisions.

MORE EX-CONGRESSMEN EXAMINED!

Boyer of Pa., and Wilson of Iowa, Tell what they Know!

Oakes Ames' Book-keeper on the Stand!

DURANT CONCLUDES HIS EVIDENCE!

B. M. BOYER'S TESTIMONY.

WASHINGTON, Jan. 18. At the session of Judge Poland's Committee on the Credit Mobilier this morning B. M. Boyer, an ex member of Congress from Pennsylvania, voluntarily appeared. He said he had nothing to conceal. He took 75 shares in his own name and 25 shares as trustee for his wife and has so held it as a legitimate stock transaction.—During the time he was in Congress neither the Credit Mobilier nor the Pacific Railroad required legislation. All subsidies and grants had been voted on before he was a Congressman. He invited a critical examination of his Congressional record; his investment in the Credit Mobilier was consequent upon the recommendation of Durant; did not see how his investment concerns the public; no one ever hinted that my services as Congressman were expected, and certainly no such services were ever rendered; regretted his investment was not larger; had no negotiations with Mr. Ames.

WILSON, OF IOWA.

Hon. James T. Wilson of Iowa next testified. Mr. Wilson's statement shows that he took 10 shares of Credit Mobilier, paying $100 per share; was urged at one time by Ames to take $5000, but declined; subsequently met McComb, who urged him to take shares, and after a long conversation with McComb during which the latter explained his difficulties, leading him (Wilson) to believe he could then get shares at low rates; he applied to Ames for 500 shares, but after considerable trouble obtained only ten shares. After making his statement both Messrs. Ames and McComb verified it so far as they were concerned. In answer to several questions he said that he realized a profit of $3000 by selling his stock. As a Government Director of the road, he desired to protest against the statements that the Government would lose its investment in that road and had no doubt that the road would pay back every dollar. Neither Ames or any one attempted to influence his Congression action; he would act the same way again; he was present when Ames asked Mr. Grimes to take $25,000 worth of stock, Ames stipulating to Mr. Grimes that he should divide with him all the dividends over 10 per cent., to which Mr. Grimes assented.

The counsel for McComb desired the personal allusions and reflections stricken from Mr. Alley's statement, which the chairman said would be considered.

C. K. GARRISON

testified that Mr. James Brooks introduced him to Mr. Durant and the latter endeavored to have him invest in Union Pacific Railroad stock, but he declined. In answer to a question of Mr. Poland as to what he thought of the reports, witness said no one could believe all they heard, if they did they would believe half of our Congressmen were interested in railroads.

OAKES AMES' BOOK-KEEPER,

George W. Kennedy, of North Easton, Mass., testified that although the books of the Company in possession of the committees showed he had 50 shares of stock, he had no information of that fact. He could not swear to the fact, but thought he saw on a pocket memorandum book some time ago two or three entries of stock to parties he supposed to be Congressmen, but could not remember who. Several shares of U. P. stock were transferred to him and retransferred to Mr. Ames without consideration.

The committee then adjourned to Monday.

COMMITTEE NUMBER TWO.

Mr. Wilson's Investigating committee met this forenoon. Oliver W. Barnes, Secretary of the Credit Mobilier from 1863 to 1870, testified, giving the history of the Credit Mobilier, by which it appears that the charter was originally sold in Philadelphia to Geo. Francis Train for about $30,000, and he Barnes signed the transfer papers. Not over 2½ or 3 per cent. had been paid in of the original shares.

DURANT RECALLED—BRIBERY CHARGED.

Durant was recalled and testified as to the franchise laws of the Sioux City branch of the Union Pacific Railroad. On being asked whether he knew of any money being paid to any persons to have certain objects accomplished, witness replied he thought Mr Oakes Ames and Mr. John B. Alley had large interests in it. He heard Ames say he had to pay others for their interest and that he paid $3000 apiece to two Iowa members of Congress to get control of the purchase. The members were J. F. Wilson and Wm. B. Allison; but witness was not positive as to Allison.

Flour is now selling to-day in our market at lower prices than could be afforded were the market to be restocked at Western prices, and the present rates of winter transportation. PRODUCE MARKET.

The following report is obtained by particular observation of the market and the quotations are the prices paid for produce from the country teams this day, or about the average for the week past:

HAY. The roads have been in very good condition during the past week and the sleighing about as good as could be wished, but the quality of produce brought into market has been very small; Loose hay has only shaded a small space abated for a stand, and the best qualities sold at about $14 to $15, though occasionally a load of very extra at $16 per ton. Pressed hay is brought into market in fair supply, and the out-door or car price seems to be about $14 to $17 per ton according to quality and condition of the bales.

STRAW. Loose straw sells current on the market at $7 to $10 per ton.

OATS are brought in in light supply and sell at an average price of about 50 cents per bushel.

BARLEY is not in great demand, selling at 55 to 60 cents per bushel.

BEANS The market is not overstocked with this line of produce and the best quality of yellow eyes are still selling at $3,25 and extra hand-picked pea beans at $3.25 to $3.50 per bushel.

PEAS are worth from $1.00 to $1,50 and $2.00 according to size and quality, and the best green imperials sell at $2,50 to $2.75 per bushel.

BUTTER continues in about the same supply and demand as for a number of weeks past, solid or packed butter, including choice lots selling at 20 to 32 and 35 cts per pound. Fair to good lump butter from 25 to 28 and what the dealers would call a right extra article would sell at better figures.

EGGS have been brought in this week only in small lots and sold at 31 to 33 cents per dozen.

POTATOES are only selling in a small way at 75 to 80 cents per bushel—very few coming into market.

POULTRY. Fresh killed, Turkies, not frozen, are worth from 15 to 17 and 18 cents, and Chickens sell all the way from 12 to 15 and 18 cents per pound. Geese sell at 75 cts to $1,00 and $1.25 each, and Ducks from 75 cents to $1,00 per pair.

GAME. Venison, by the whole deer, is worth from 7 to 10 cents and saddles from 12 to 15 cents per pound. Partridges 20 to 25 cents and Rabbits 8 to 10 cents each.

APPLES. Green apples are in good supply, selling almost daily on the market at $1,50 to $2,00 and $3,00 per barrel.

DRIED APPLES are coming in slowly and a good fair article sells at 8 to 8½ cents per pound, though extra lots of quartered and sliced would probably sell up into the figures.

FRESH MEATS. Round hogs are plenty on the market at from 7 to 7½ for home raised and Western produce and fresh beef sells on the market by the quarter or side, from 8 to 10 cents per pound. Mutton and Lambs fresh killed from 7 to 10 and 11 cents per pound.

WOOD AND COAL. The best quality of dry hard wood sells at $6,50 a $7,50 to $8 00 per cord and soft do., $4,00 to $5,00. The best qualities of coal for kitchens and furnaces are sold at $9.50 to $10,00 per ton. Soft coal one shilling per bushel.

WOOL. The best quality of wool seems to be dull at 58 to 60 cents per pound and wool skins sell at $1,50 to $2.00 and $2.25 each, Hides sell at 8½ to 9 cents per pound.

POLITICAL AND PERSONAL.

Blair and Trumbull, free traders, will be succeeded in the Senate by ardent protectionists.

The vote for a United States Senator to succeed Conkling will be taken in the New York Legislature on Tuesday next. Mr. Conkling will be his own successor.

Blair's friends are greatly displeased with Bogy's election, and already talk about an investigation in the Missouri Legislature of charges of bribery and corruption.

The Hartford *Courant* says: "Put it down, as pretty certain that Richard D. Hubbard of this city will be renominated" for Governor of Connecticut by the Democrats.

An election will be held Feb. 10, in the Eighth Georgia district, to fill the vacancy caused by the death of Gen. Ambrose R. Wright.

Clearfield county, Pa., a Democratic stronghold, has voted in favor of local option in liquor-selling, which the Philadelphia *Press* takes as an indication that the Democracy is no longer joined to its idols.

The Richmond *Whig* gives as the problem now before the Virginia Legislature, "the means by which an impoverished people can realize an increased revenue from diminished resources, without at the same time necessitating an increased rate of taxation."

The New York *Commercial* likens those Reformers who have snug berths for themselves and friends to "the old rat who announced to his children that he proposed to retire from the wickedness of the world, and was found stuffing himself inside of a huge cheese."

The election of United States Senator from Alabama, vice Spencer, promises to develop some singular features. The factions within the Republican party are so balanced that the Democrats may name the man (a Republican, of course), and both parties are eagerly canvassing for the best man.

Astonishing, the amount of comfort the opposition papers have taken with that phantom of their own conjuring, the attendance of the West Point cadets on President Grant's inauguration. They probably worry over the effect of "the iron heel of military despotism on the neck of constitutional liberty," and all that sort of thing.

Mr. Blake, who characterized the Washington Treaty as "that appalling transaction," at the Reform banquet in Toronto the other evening, is prominently named as the leader of the opposition in the Canadian Parliament this winter, though with the retiring modesty of a Horatio Seymour, he lately asserted his intention to remain a private member of the House, even in the event of a ministerial crisis and change of cabinet.

THE LOOMIS AERIAL TELEGRAPH. The following are said to be the features of the scheme, which has been seeking incorporation by Congress:

The plan of Dr. Loomis, the inventor, is to telegraph from a high peak of the Rocky Mountains to the highest attainable peak of the Alps. At each point a tower is to be erected, on the top of which a huge mast is to be placed. An apparatus capable of collecting electricity is to be put upon the upper end of this mast, by means of which on such elevation on it is claimed a strata of the atmosphere will be reached which is charged with electricity. Ground connections, the same as in ordinary telegraphy, will be effected. This electrified strata of the atmosphere will, as with the ordinary single wire and ground connections, make a complete circuit, and it is claimed that the slightest pulsation of the electricity at one tower will produce a similar pulsation at the other. The company is to have a capital stock of two hundred thousand dollars, with the privilege of increasing the same to two millions if the interest of the company shall require it. The business and objects of the corporation, as stated in the bill, are to develop and utilize the principles and powers of natural electricity to be used in telegraphing, generating light, heat and motive power, and otherwise make and operate any machinery run by electricity for any purpose.

THE SAMANA BAY SCHEME. A New York dispatch states that the object of the Samana Bay Co., is to obtain the official protection of the United States, then lease the Bay as a naval station to our Government, thus making the U. S. Treasury pay the whole expense of the private venture and finally a heavy lobby, armed with the stock of the company, will press annexation upon Congress. [illegible]

NEW MAGAZINES.

The February ATLANTIC is out, and is as usual full of good things. Among the prominent features are the second chapter of W. D. Howell's "A Chance Acquaintance," Boy Life in a Scottish Country Seat, by Robert Dale Owen, Thomas Jefferson, Secretary of State, by James Parton, a poem by Whittier entitled "A Mystery," English Folk Songs, by J. V. Blake, a very interesting article on "Telegraph and Post Office," by E. H. Derby, Edible Fungi by Morris Copeland and the Editorial Department. The musical critiques of the *Atlantic* are an excellent feature. That of the February number embraces admirable notices of Thomas' Orchestra, and Mrs. Chas. Moulton, who the writer considers one of the best oratorio singers of the present age.—James R. Osgood & Co., Publishers; Boston.

TWEED'S MAGNIFICENT ROBBERIES—GARVEY'S TESTIMONY AGAINST THE BOSS. A N. Y. dispatch of Friday says: "Andrew J. Garvey was the feature of this, the eighth day of the Tweed trial. He told the story of the astounding conspiracies to plunder the city in very much the same way as at Mayor Hall's trial, and clearly established all the allegations preferred against Tweed, in spite of the strenuous efforts of the latter's counsel to stop his mouth. He told how claims for $395,000 were stretched so that $1,177,-513.07 was drawn out of the treasury, charged to work on the new court-house; how work was done on the private property of Tweed, Connolly and Woodward, and not only paid for out of the city's moneys on court-house warrants but were made the foundation for warrants for immense sums, warrants for $3085?8 24 being drawn on the basis of plans executed and work begun on a house, coach-house and surroundings for Connolly, which the 'great plasterer' estimated before he undertook the job would require but $120,000 or $130 000; how Tweed's name was written across the face of each of his bills, indorsing them as correct; how shares of the money drawn out on these warrants were deposited to Tweed's account, and how when he did work on the court-house in 1864 he added 15 per cent. to his bills, which he personally gave to Tweed, the latter saying to him, 'Give that to me and I will take care of your bills.' He easily and clearly showed how Woodward and Ingersoll, who 'stretched' his bills and gave him 35 per cent. of their face when he turned over checks for 65 per cent. were operated as the cat's-paws of Tweed. During the examination of Garvey, Tweed was in court and tried and tormented the wretched penitent by eyeing him incessantly. Garvey winced somewhat and exhibited not a little nervous excitement, but Tweed was calm and brazen-faced and displayed that wicked broad grin which Nast has made so familiar through his cartoons, evidently enjoying the plasterer's discomfiture. J. McBride Davidson, the safe manufacturer who sold safes to the ring for the city's use and to set up in their private establishments, all on bills charged to the city, confirmed Garvey's testimony regarding the manner in which the bills were increased."

It is stated that a new horse disease of a dangerous kind is prevalent in New York city. Surgeons pronounce it spinal meningitis, and it is believed to be an outgrowth of the distemper recently prevalent. It was caused by working the horses before they had fully recovered. There have been several fatal cases already.

THE WHARTON POISONING CASE. In the trial of Mrs. Wharton at Baltimore, Friday, Dr. Williams was cross-examined, and Mrs. Van Ness testified to attending her husband when he was sick at Mrs. Wharton's. On one occasion when he was getting better, after partaking of tea and toast given him by Mrs. Wharton, he was taken dreadfully sick. Subsequently when the doctor ordered milk, the sister of Mrs. Van Ness tasted of a tumbler of milk taken from the side-board, and pronounced it bitter as gall, when Mrs. Wharton jumped from the sofa and brought a pitcher of milk which proved to be sweet. Shortly after Mrs. Van Ness saw Mrs. Wharton at the side-board and heard the rattle of paper out of which she was shaking something. Saw her put the paper in her pocket and move off. Next day Mr. Van Ness again was made violently sick by beef tea which Mrs. Wharton gave him. Dr. Chew testified that in his opinion Van Ness' sickness was due to the administering of strychnine.

LIFE SAVED BY TRANSFUSION.—The process of the transfusion of blood from the veins of a healthy into those of a diseased person is certainly a remarkable achievement of medical science, more especially as it seems that the result is the improvement of the patient. There have been reports of several such successful operations lately, but the most marvellous one of all is that in which the blood of a lamb was substituted for that of a human being. It was performed by a learned professor at Naples without the intervention of any mechanical force. His patient was a lady thirty years of age, dying from anemia caused by frequent hemorrhage. The doctor determined to set aside the theory of injection, and to connect the transfusion direct from the carotid artery of a young lamb, depending upon the pulsations of its heart for the impelling force. [illegible] which the diseases of anemia has a severe contracting influence. The record of the case goes on to show its entire success, and describes the minute details of the operation, which was conducted with remarkable care and forethought. It further says that the patient, immediately succeeding the operation, became very tranquil, fell into a refreshing sleep, and has since given continuous evidence of improvement. The bold experimentor was Signor Giuseppe Albini, Professor of Physiology in the University of Naples. We mention the case as being the most interesting of the kind, and as opening a new field for physiological experiments in the treatment of certain diseases.

BUSINESS ITEMS.

GREAT REVOLUTION IN IMPROVEMENTS OF 1870.—Nute's Hand Power Loom, one of many inventions, has a history of which the Pine Tree State should be proud. Science in regard to hand manufacturing looms, for domestic use, during the revolution of all other improvements, has failed to produce a loom, cheap, durable, and simple in construction. But the Mendenhall Loom manufactured in Philadelphia, is the only loom; secured by letters patent, aside from the New England, claiming as its origin J. E. Nute, a genius of Maine, born in obscurity in the valley of the Penobscot.

Here was conceived a principle which gave birth to the loom which has been on exhibition in Bangor, in its youthfulness and vigor. Hundreds will testify for the loom, it requiring the strength of a child only, to operate it, it being simple and cheap in its construction, making it a fit companion for the sewing machine, is worthy of investigation, being linked together with other patent rights, making the journey of life a life of comfort and happiness, by reducing labor to a science and pleasure. Through the devices of man the human family are daily fed, clothed and lodged by patent right secured. The assignee of this invention will remain in the State till February 1st. Parties who have interested themselves in the Loom, wishing further correspondence in regard to certain counties in the State, please address the subscriber at Portland, Maine, till February 1st, after that, Cleaveland, Ohio.

The Last Half Million
OF THE
7 PER CENT. GOLD BONDS
ISSUED BY THE
CHICAGO, DANVILLE & VINCENNES
Railroad Company.

Are now offered for sale, about $3,500,000 having already been sold.

The road (212 miles in length) is the air-line low-grade route to Chicago from the Indiana Coal Fields.

That portion of the road (132 miles) which has been in operation since December, 1871, has earned, over and above all expenses,

$262,313.48.

Its interest obligation upon Bonds, for the same time, being but $160,416.67 gold.

The net earnings increased from $15,853.4[?] in December, to $28,339 87, in October the latter being at the rate of $340,795.44 per annum. The total interest liability upon the total issue of Bonds on the whole is $250,000 gold. The 132 miles are, therefore, earning, net, more than enough to pay interest upon the entire bonded debt upon the 212 miles.

These figures give the best assurance, to careful investors, that the First Mortgage Bonds of this Company are SAFE BEYOND QUESTION.

The Indiana Division, giving direct access to the coal mines, and completing the connection between them and Chicago, will be in operation by January 1st, and the earnings of the road will be thenceforth largely increased.

The company is not in debt, and owns a large and very valuable real estate in Chicago, beside having an equipment of twenty-four first-class locomotives and about 800 cars.

The Bonds are at the rate of $16,500 per mile, are for $1,000 each, and have forty years to run, the interest (at 7 per cent. gold), payable in New York, April 1st, and October 1st.

The present price is 90 and interest from October 1st, the Company reserving the right to advance the price at any time.

Early orders are suggested, in order to secure any portion of this extremely desirable loan.

VACCINATION.—Believing that the inefficiency of vaccination results from the long time which human vaccine virus has been propagated from one person to another, all the way from ten to seventy years, and the most reliable security from that loathsome disease, the small-pox, is where the virus has been taken direct from the healthful animal to the human system, as was the case when its protecting power was first discovered, and when so used, is usually the most mild and perfect in action, I have received direct from the animal and shall receive additional supplies weekly, taken by my own hand, some pure cow virus, with which I offer to vaccinate those who desire or test the efficiency of their former vaccination, at 105 Hammond street. A CHINESE SONG

He saw in the light of his house
At least as we're told
A wee sucking snail or mice,
At the least her long right well

If Frankie or Charlie chases,
And they can't be kept on leash
He'll chew up picking and berries
And frocks at him at all

If Fannie or Sybil follow you,
How will they the harvest in
Will they think yourself and your mulberries
To good for a Mandarin!

I have yellow gold in my sleeve,
But oh, answers I sharp and bold—
Be off, not work by my mulberries
I am bought by no one's gold!

She crutched in stares with her pan—
Till he turned and fled for life
For the baby picking mulberries
Was his true and virtuous wife!
